

Node Stack – Complete L1 Interview + Coding Guide (v2)

This updated version includes HR and technical interview questions for HTML, JavaScript, TypeScript, and Node.js — plus coding tests for all sections. All answers are kept short and easy to understand with brief code examples for quick revision.

Section 3: HTML Coding Tests (5 questions)

1. Create a simple HTML form with name and email fields.

```
<form><input type='text' name='name' required><input type='email' name='email' required><button>Submit</button></form>
```

2. Add an image that links to Google.

```
<a href='https://google.com'><img src='logo.png' alt='Google'></a>
```

3. Create a table with 3 rows and 2 columns.

```
<table><tr><td>Row1 Col1</td><td>Row1 Col2</td></tr><tr><td>Row2 Col1</td><td>Row2 Col2</td></tr><tr><td>Row3 Col1</td><td>Row3 Col2</td></tr></table>
```

4. Create a navigation bar using and .

```
<ul><li>Home</li><li>About</li><li>Contact</li></ul>
```

5. Create a responsive layout using divs.

```
<div style='display:flex;flex-wrap:wrap;'><div style='flex:1'>Box1</div><div style='flex:1'>Box2</div></div>
```

Section 5: JS/TS Coding Tasks (10 questions)

1. Reverse a string in JavaScript.

```
const str='hello'; const rev=str.split('').reverse().join('');
```

2. Find max number in an array.

```
const arr=[1,5,2]; const max=Math.max(...arr);
```

3. Check if a number is even or odd.

```
num%2===0 ? 'even' : 'odd';
```

4. Filter even numbers from array.

```
arr.filter(n=>n%2===0);
```

5. Create a function to check palindrome.

```
function isPal(s){return s===s.split('').reverse().join('');}
```

6. Example of a Promise in JavaScript.

```
new Promise((res,rej)=>setTimeout(()=>res('done'),1000));
```

7. Async/Await example.

```
async function test(){const d=await fetch('/api'); console.log(d);}
```

8. TypeScript interface example.

```
interface User{name:string;age:number;} const u:User={name:'Ram',age:25};
```

9. TypeScript generic function example.

```
function identity<T>(arg:T):T{return arg;}
```

10. Example of optional chaining.

```
const city=user?.address?.city;
```

Section 8: Final Mixed Coding Challenge (5 questions)

1. Create a basic Express server.

```
const express=require('express');const  
app=express();app.get('/',(r,s)=>s.send('Hi'));app.listen(3000);
```

2. Create POST /login endpoint.

```
app.post('/login',(req,res)=>{if(req.body.user==='admin')res.send('ok');else  
res.status(401).send('fail');});
```

3. Serve static files from 'public' folder.

```
app.use(express.static('public'));
```

4. Connect to MongoDB.

```
mongoose.connect('mongodb://localhost/test');
```

5. TypeScript + Node function to log user.

```
function logUser(u:{name:string;id:number}){console.log(u.name);}
```
